BASIC PLAN

CRYPTONYM: AECHAMP

1. Objectives

The primary FI objectives of this project are as follows:

- a. To organize and develop the underground and resistance forces in the Lithuanian SSR for the purpose of establishing support points and agent nets for the procurement of intelligence and operational data.
- b. To organize and develop channels of communication leading into the Lithuanian SSR for the purpose of obtaining intelligence and possibly to introduce agents into the target area under the REDSKIN Program.
- c. To facilitate the penetration of the USSR through agent nets and support points in the Lithuanian SSR.
- d. To develop cordial and advantageous operational relationships with friendly intelligence services as they may concern our mutual operational interests in the Lithuanian SSR in accordance with sub-paragraph 1b of paragraph C of the USSR Country Program Fiscal 1953.

2. Evaluation of FI Operations during FY 1953

- a. Other than that procured from overt publications, the information obtained from Lithuania through FI operations and from the interrogation of repatriates has been the exclusive source of information from this area. In view of this, information procured from FI operations is of great value. The following represents an approximate analysis of reports received on Lithuania since May 1952:
  - (1) 57 messages received from one FI agent inside Lithuania giving an accurate picture of the present resistance situation in that country.
  - (2) Approximately 60 reports obtained from escapees and German repatriates from Lithuania, and through special liaison with persons receiving information from Lithuania by mail and by monitoring Lithuanian radio stations. Most of these reports deal with conditions inside Lithuania and present accurate operational data.

~~TOP SECRET~~  
SECRET  
SECURITY INFORMATION

80339

~~TOP SECRET~~  
SECURITY INFORMATION

- b. In view of the production and the personnel, time, and funds expended, as well as the security risks taken, this basic plan can be justified. At present, three case officers and three assistant case officers are assigned to implementing the plan at Headquarters and in the Field. In addition, seven agents are under contract primarily for interrogation and training purposes, and three field agents have been recruited of whom one is presently in the target area, and the remaining two in training.
- c. In furtherance of the USSR Country Plan, a large amount of operational data has been procured during the past fiscal year. CIA and the British Intelligence Service (SIS) collaborated closely on a proposed joint operation into the Lithuanian SSR. Although this operation was terminated, close liaison between the two services was developed on the operational level. During the six months that [ ] a valuable relationship was established which will be of definite benefit in future CIA operations into Lithuania.

3. Progress of the Operation

- a. Since March 1953, three s/w letters received from our agent in Lithuania have established that he was probably not under Soviet control as of December 1952. In the three letters received, he reported large round-ups of partisans resulting from treachery on the part of certain partisan leaders. In these encounters, his w/t equipment was lost and most of his partisan unit destroyed. He was last known to have been in hiding, but in contact with an established mail-drop. Money was sent to assist this agent. Based on the letters received, there is some certainty in the assumption that this agent is not under Soviet control and that previous information on contacts in Lithuania sent by him may be used in future operations.
- b. Definite progress was made during the past year in establishing close and cordial relations with the British Intelligence Service. As a result of this relationship, the assistance of the SIS in future operations may be expected.

4. Future Plans

- a. Plans are presently being made for a tourist mission through Lithuania and exfiltration via NW, USSR. This operation is planned for early fall 1953.
- b. A REDSKIN operation is presently being planned for early fall

~~TOP SECRET~~  
SECURITY INFORMATION

~~TOP SECRET~~  
SECURITY INFORMATION

1953 to be based in either [ ] . One agent has been recruited for this operation and is now in training.

c. If the operation described in paragraph 4a above is successful, a more extended Lithuanian operation will be conducted in spring 1954 based on data compiled on the tourist mission.

5. Changes Necessary

The major change from recent AECHAMP operations is in the transfer of Lithuanian operations from [ ] to Headquarters, DOB. The termination of the joint SIS operation will no longer necessitate a case officer for Lithuanian operations [ ]. The agents who will participate on future Lithuanian missions will be trained at DOB, and dispatched [ ].

6. Benefits

Field agents under this project will receive benefits similar to those prescribed in the Missing Persons' Act.

7. Financial Expenditures and Requirements

a. Total FI allotment for FY 1953 [ ]

b. Total expenditures [ ]
